

MINISTRY OF WORKS AND TRANSPORT STANDARD GAUGE RAILWAY PROJECT

PUBLIC ANNOUNCEMENT

MALABA-KAMPALA STANDARD GAUGE RAILWAY

STATUTORY ACQUISITION OF RIGHT OF WAY (SGR CORRIDOR)

The Government of Uganda through the Ministry of Works and Transport is developing a Standard Gauge Railway (SGR). This will be a modern, high-capacity standard gauge railway system that is efficient, reliable, safe and affordable for both freight and passengers.

In order to secure a seamless flow of traffic from Mombasa to Kigali and Juba, the four countries of Uganda, Kenya, Rwanda and Southern Sudan during the 2nd summit for the Northern Corridor Integration Projects (NCIP) agreed to similar specifications and standards.

The Ministry of Works and Transport/ SGR Project Management Unit (PMU) has optimized this alignment with both consultants and the contractor and agreed on the optimum alignment based on agreed standards and specifications. Notably are, a minimum radius of curvature of 1200m, a maximum gradient of 1.2% and socio-economic considerations. The agreed alignment/ route/corridor has been gazetted vide statutory instrument 64 of 2015.

The first phase of the development comprises of an Eastern route from Malaba to Kampala. The Ministry of Lands, Housing and Urban Development (MLHUD) has gazetted the SGR right of way corridor from Malaba at the bridge to Kampala through the districts of Tororo, Butaleja, Namutumba Iganga, Luuka, Mayuge, Jinja, Buikwe, Mukono, Wakiso and Kampala. This includes land for eleven proposed stations in Tororo, Nagongera, Buwola, Nakawa, Iganga, Magamaga, Jinja, Balumagi, Lugazi, Namanve (Kampala East) and Kampala City. The right of way corridor is 100m wide from Malaba to Magamaga, 130m wide from Magamaga to Namanve, and 60m wide from Namanve to the existing Uganda Railways Corporation (URC) Workshop at Nalukolongo.

The Ministry of Lands, Housing and Urban Development has written to all District Administrative Officers, District Authorities, District Land Boards, and District Land Offices along the alignment to halt all land transactions on the gazetted land.

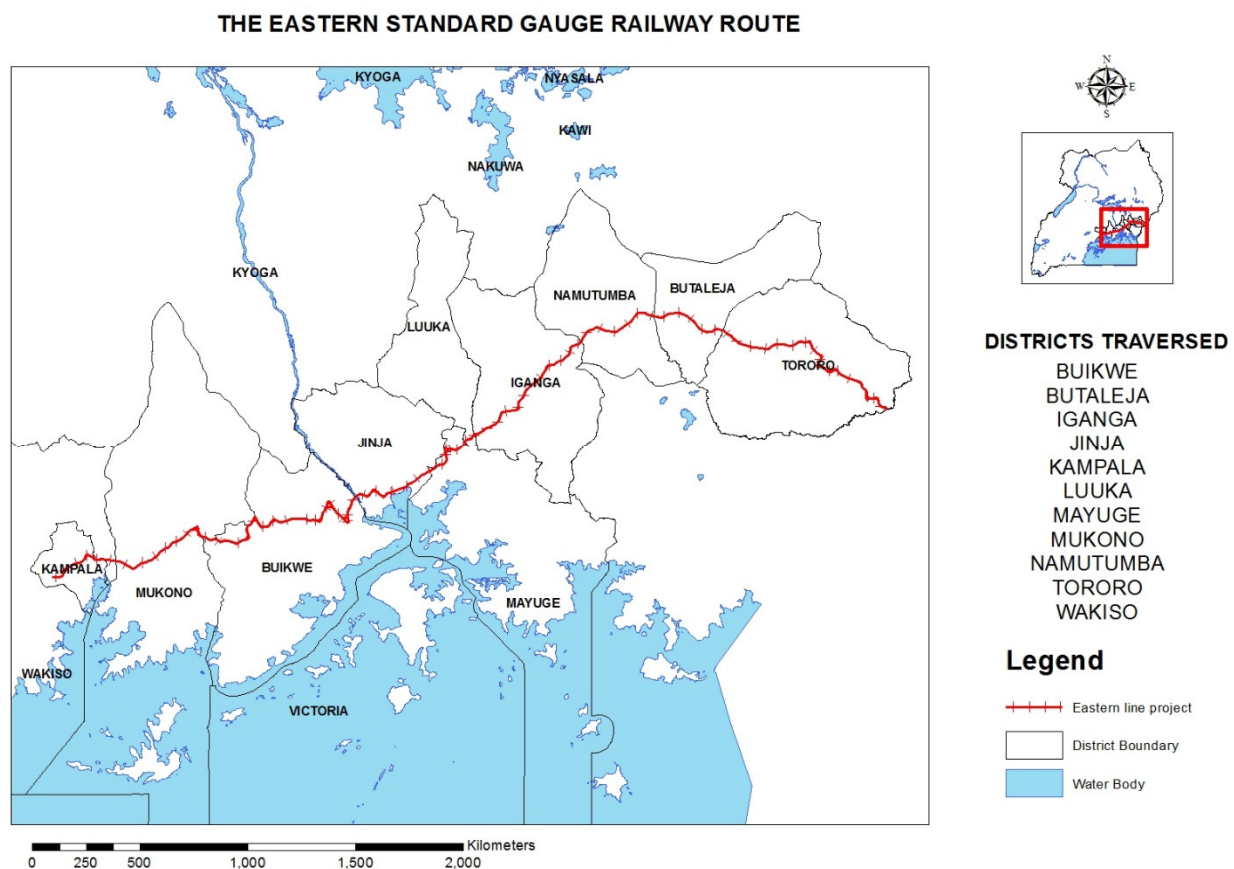

The Project Management Unit is in the process of informing major Project Affected Persons about the development and requests for their maximum cooperation and support. SGR PMU comprising of sociologists, surveyors, valuers, engineers and economists have embarked on the land acquisition process and are on the ground.

All Project Affected Persons will be duly compensated according to the laws of Uganda.

The Ministry of Works and Transport/ PMU takes this opportunity to inform the public and to seek public support for a successful implementation of the Project.

Although this alignment affects some key installations and private property the socio-economic benefits that arise from development of an efficient Railway system outweighs any private interests.

Appended is the list of villages by district, sub-county and villages to be affected.

Districts traversed by SGR Eastern Route
